

Glass Top

The solar collector simply lifts up from the glass topper. No need to remove entire light. You will now have access to replace batteries and or solar collector as needed.

Metal Top / Natural Top

Run your finger under the edge of the cap and feel for the rough spot (A).

Firmly pressing inward on one adjacent side of the housing (C), while also pulling upward on the topper, (B) releases the peg from the hole, (Lifting up). No need to remove the entire light. You will now have access to replace batteries or solar collector; spread tabs (D).
