

# Waypoint® Low Voltage Lighting

*Lighting the Way*

## HELPING YOU LIGHT THE WAY.

Waypoint® Low Voltage Lighting installs easily using our innovative “plug and play” system. The system installs post to post with ease and with no lengthy wire to run from the transformer to the end of your project. Each light plugs into a 6-outlet junction box, typically placed in each post. Star Bright In-Rail lights connect to the junction box as well or to each other in a “Daisy Chain”. No low voltage system is easier to install than Waypoint® Low Voltage Lighting.

Post Cap with Plug In Wire  
(Light with frosted glass shown)

24" Strip Light installs under  
bottom rail or overhang of deck/steps

Post Sconce with Plug In Wire

Star Bright In-Rail Light with Plug In Wire.  
Each Light connects to another.
